PRODUCT DATA SHEET

AMBERLITE™ IR120 Na Industrial Grade Strong Acid Cation Exchanger

AMBERLITE IR120 Na resin is a gel type strongly acidic cation exchange resin of the sulfonated polystyrene type. It is used for water softening (in Na⁺ form) as well as for water demineralisation (in H⁺ form) in co-flow regenerated units. AMBERLITE

* 1 BV (Bed Volume) = 1 m^3 solution per m^3 resin

IR120 Na resin is an excellent general purpose cation exchange resin that can be used for a wide variety of industrial water treatment applications including both softening and demineralisation.

Physical form	Amber spherical beads	
Matrix		
Functional group	Sulfonate	
Ionic form as shipped	Na ⁺	
Total exchange capacity [1]	$\geq 2.00 \text{ eq/L (Na}^+ \text{ form)}$	
Moisture holding capacity [1]	45 to 50 % (Na ⁺ form)	
Shipping weight		
Particle size		
Uniformity coefficient ^[1]	≤ 1.9	
Harmonic mean size [1]	0.600 to 0.800 mm	
< 0.300 mm ^[1]	2 % max	
Maximum reversible swelling	$Ma^+ \rightarrow H^+ \le 11 \%$

PERFORMANCE

The operating capacity depends on several factors such as the water analysis and the level of regeneration. The data to calculate the operating capacity and the ionic leakage with co-flow regeneration are given in the Engineering Data Sheets: EDS 0262 A, EDS 0264 A and EDS 0265 A.

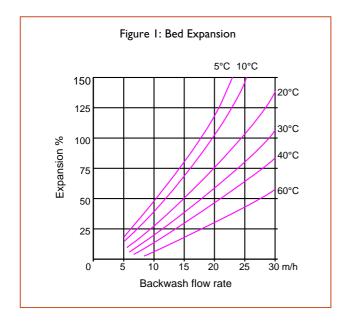

LIMITS OF USE

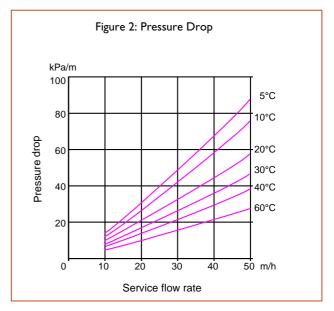

AMBERLITE IR120 Na resin is suitable for industrial uses. For other specific applications such as pharmaceutical, food processing or potable water applications, it is recommended that all potential users seek advice from Rohm and Haas in order to

determine the best resin choice and optimum operating conditions.

HYDRAULIC CHARACTERISTICS

Figure 1 shows the bed expansion of AMBERLITE IR120 Na resin, as a function of backwash flow rate and water temperature. Figure 2 shows the pressure drop data for AMBERLITE IR120 Na resin, as a function of service flow rate and water temperature. Pressure drop data are valid at the start of the service run with clear water and a correctly classified bed

ROHM!HAAS 🔼

AMBERJET is a trademark of Rohm and Haas Company and its affiliates, Philadelphia, U.S.A. Ion exchange resins and polymeric adsorbents, as produced, contain by-products resulting from the manufacturing process. The user must determine the extent to which organic by-products must be removed for any particular use and establish techniques to assure that the appropriate level of purity is achieved for that use. The user must ensure compliance with all prudent safety standards and regulatory requirements governing the application. Except where specifically otherwise stated, Rohm and Haas Company does not recommend its ion exchange resins or polymeric adsorbents, as supplied, as being suitable or appropriately pure for any particular use. Consult your Rohm and Haas technical representative for further information. Acidic and basic regenerant solutions are corrosive and should be handled in a manner that will prevent eye and skin contact. Nitric acid and other strong oxidising agents can cause explosive type reactions when mixed with lon Exchange resins. Proper design of process equipment to prevent rapid buildup of pressure is necessary if use of an oxidising agent such as nitric acid is contemplated. Before using strong oxidising agents in contact with lon Exchange Resins, consult sources knowledgeable in the handling of these materials.

Rohm and Haas Company makes no warranties either expressed or implied as to the accuracy or appropriateness of these data and expressly excludes any liability upon Rohm and Haas arising out of its use. We recommend that the prospective users determine for themselves the suitability of Rohm and Haas materials and suggestions for any use prior to their adoption. Suggestions for uses of our products of the inclusion of descriptive material from patents and the citation of specific patents in this publication should not be understood as recommending the use of our products in violation of any patent or as permission or license to use any patents of the Rohm and Haas Company and its affiliates. Material Safety Data Sheets outlining the hazards and handling methods for our products are available on request.
