Manure Pit Treatment

Specifications

Form: Free-flowing granular powder

Color: Brown Specific Gravity: 0.5 - 0.7

Nutrient Content: Biological nutrients, stimulants

& surfactants

Plate Count: 5 billion per gram

Packaging

25 lbs. per plastic pail containing 4, 8 or 16 oz. water soluble packages.

10 kg. per plastic pail containing 250 g. water soluble packages.

Storage

DO NOT FREEZE! Store in a cool dry location. Do not inhale dusts, avoid excessive skin contact. SEE M.S.D.S.

Application Instructions

Úl a & As packaged in water soluble pouches for direct addition to lagoon or manure pit at the following rates:

Add 10 kgs (or 25 lbs.) per month per 500 cows or 2000 pigs.

Application rates and locations depend on manure dimensions and current biological conditions.

Use in accordance with all Federal and State regulations. Results will depend upon site and climate conditions. Avoid extreme pH and temperature conditions.

"I bought the product to reduce my odor, to be a good neighbor. I could not believe it when I pumped my lagoon out after just 6 months. Most of the solids were gone." -Bā Ó * Ácustomer

Case History 961

In 1996 a university study was conducted at a hog farm in Europe which housed 800 hogs and produced a waste volume of 600 m³. After a four week period BIO-SYSTEMS] | a * &chad successfully liquified the 10cm slurry to a far greater extent than the control. A V@A: I a & & a lso decreased organic content and increased nitrogen content and ammonia, all making for a better fertilizer value.

Composting of Pig Manure mg/kg and % Parameter

	Control	BioBug
% dry	22.5	7.93
pН	7.1	7.52
% org	11.03	5.22
Nmg/kg	5.92	10.65
NH3mg/kg	1.7	5.02

Manure Pit Treatment

Baj O * ÁT Vácontains a specially formulated læ) * ^ Ákof Áadapted Ánigh-performance microorganisms Áand Ámicronutrients developed for use in the biological digestion of animal wastes. As well as { a& [[| * æ) a { Ê Baj O * ÁT V Ácontains Ásurface Áko } • aj } Á å | | ^ • • æ) Ó and penetrants.

The biological action of Bā Ó * ÁT V works åā^&d^ Áon odor causing compounds by ā ããææā * Áorocess Áof Ánydrolysis Áand àā Ë ¢ããææā } ÈV @ Áend result is a much lower ÓU ÖÁæ åÁÔU ÖÁ Áhe manure and reduced [å[¦• Á [oÁ }]^ Áduring storage, but after the { æ * '^Aæ Áoen spread on crop land.

Use of Ba O * AT V will also help to maintain adiquid slurry in the tank and prevents a build up of solids. Ultimately, this saves time and money because little or no mixing is needed prior to spreading.

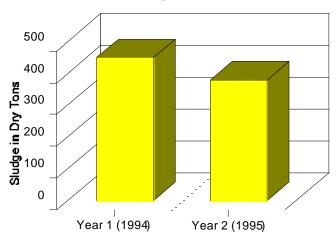

Furthermore, the microbes in Bā Ó * ÁT V cause nitrogen fixation creating a better fertilizer value. The nitrites and nitrates formed are a stable form of nitrogen readily available to crops.

Benefits of BioBug MT:

- · Ensures rapid biological start-up
- Enhances and accelerates the biological digestion of animal wastes
- Reduces costs of manure pit maintenance and drainage
- Breaks up solids and decreases organic content
- Reduces formation of bad odors
- Improves overall quality
- · Increases nitrogen content and ammonia, making for a better fertilizer value.
